

2.2 Manifold cabinet UF in-wall

Installation

1. Remove the front frame and the base cover from the cabinet.
2. Place the cabinet in the recess in the wall, straighten it using the adjustable feet and fix it to the unfinished floor.
3. Mount the bracket set to the rear side of the manifold.
4. Snap the VarioManifold into the C-rails and affix with the screws.
5. Connect the connection pipes. To do so, pre-cut opening plates on the right and left can be broken open.
6. Fix the wall cabinet in the wall with quick setting cement. Screw it to the supporting structure in the drywall.
7. Lay out the heating/cooling distribution circuits. Feed the flow and return to the heating surfaces.

In-wall mounted front frame:

- 8a. Attach the screed facing (this will not be plastered over later) – this covers the area between the front frame and the finished floor level. Cover all visible parts well (e.g. with painter's tape) – protect the opening from dirt with card or plastic film.
- 9a. After completing the wall, remove the protective coverings or adhesive tapes and attach the doors.

Wall-mounted front frame:

- 8b. Attach the screed facing (this will not be plastered over later) – this covers the area between the front frame and the finished floor level. Align the front box edge to the finished plaster edge or finished wall edge. Cover all visible parts well (e.g. with painter's tape) – protect the opening from dirt with card or plastic film.
- 9b. After completing the wall, remove the protective coverings or adhesive tapes and attach the front frames and doors.
